

BioComp[®]
By POLYDIME

Shopping Bags

POLYDIME has been associated with the plastics industry since 1998 producing Polythene in roll, bag and pouch form, Alkathene and drip irrigation pipes, multilayer lamination films and pouches. We take pride in being one of the sought after names in the plastics packaging industry in Sri Lanka & Internationally.

BioComp shopping bags are made from 100% Corn Starch based polymers that make the product biodegradable and then compostable once thrown into a landfill, after its use. The raw materials used to manufacture BioComp are blended internally to ensure high tensile and elongation, ability to carry the same weight as a regular Polymer based shopping bag of the same size and can be printed with almost any colour and design based on customer requirements.

With the ban on single use plastics moving in the world, Polydime has taken initiative to pioneer the move towards sustainable plastic products in Sri Lanka.

Certified Biodegradable and Compostable from:

- Dincertco, Germany
- Biodegradable Products Institute
- Vincotte, Belgium

Manufactured with certified Raw Materials that confirm Biodegradation & Compostability, based on Scientific tests run as per EN13432:2000-12, ASTM 6400. Product meets EU Food contact Standards.

POLYDIME INTERNATIONAL (PVT) LTD

No. 27, Old Ambathale Road, Mulleriyawa North, Angoda, Sri Lanka.
